EXPERIENCE

My experience includes over 6 years across oil and gas, retail, and food service. With this I have created a strong base in customer service.

EDUCATION

Holberton, Tulsa, OK

January 2020 - September 2021 (Currently attending)

Holberton is a 20 month full-time school focused on training software engineers, teaching a strong foundation in coding, collaboration, and logical thinking. The curriculum at Holberton is taught with project based learning and peer based learning.

PROJECTS

[Onlymemes.biz](#) — *Web App*

Onlymemes is a website designed and created by myself and two others in about two weeks. It is served on an NGINX server, while all information is loaded dynamically with Javascript and JQuery from a Rest API that connects to an SQL database. The web pages were made with HTML and CSS.

[Simple Shell](#) — *Written in C*

A partner and I were tasked with creating a simple shell using only C. With a strict 2 week deadline we made a fully functional shell, free of memory leaks.

[AirBnB Clone](#)

A simple AirBnB clone made over several weeks. It is a fully functional web app that loads all information to the front end using an internal database. The app is fully dynamic.

SKILLS

- Front End Development
- Back End Development
- Attention to Detail
- Teamwork
- Customer Service
- Multitasking
- Creative Thinking

LANGUAGES and TECHNOLOGIES

- Python
- C
- ORMs
